ABOUT THE WEBINAR

The proposed webinar under the patronage of Department of Forensic Science of the Jharkhand Raksha Shakti University aims at creating awareness about Forensic Science and its future prospects and probable challenges. Forensic science sits at the intersection of science, law, policing, government and policy. It is a complex ecosystem that has competing demands and drives to deliver science to assist the criminal justice system.

Forensic science is nothing short of a technological success story; it is possible to detect and identify forensic traces at greater levels of resolution and accuracy than ever before, and we can capture, retain and search more data than at any other time in history. These capabilities are transforming what forensic science can do. However, at the same time, forensic science is facing a huge challenge.

TARGET AUDIENCE

- ❖ Academicians**
- ❖ Research Scholars**
- ❖ Students of Universities, Colleges and Professional Institutions**
- ❖ Professionals**
- ❖ Government Officials**

KEYNOTE SPEAKER

Dr. A. K. Bapuli
Director, FSL, Ranchi.
